## **For Immediate Release**

### **Proxicast Releases New IPSec VPN Client for Windows**

**Pittsburgh, PA. (February 2, 2009) – Proxicast ([www.proxicast.com](http://www.proxicast.com))**

Proxicast, manufacturer of the LAN-Cell family of 3G cellular routers, has teamed with TheGreenBow Security Software to develop the Proxicast IPSec VPN Client software for Windows which offers customers a simple to deploy and easy to use VPN solution for remote access over 3G cellular networks.

TheGreenBow, a leading developer of enterprise security software for computer and mobile devices, has provided its OEM VPN technology to Proxicast's IPSec VPN Client software for Windows to be deployed with Proxicast's LAN-Cell series of 3G cellular routers.

"Proxicast's LAN-Cell 2 has the most advanced and flexible VPN capabilities of any 3G router on the market today. The LAN-Cell 2 has routing and security features typically found only in wired corporate routers costing thousands more, yet it is priced competitively with stand-alone cellular modems," says Proxicast COO James B. Sabol. "Integrating TheGreenBow's technology into our new IPSec VPN Client software for Windows allows our remote users to tap the LAN-Cell's security capabilities with minimal effort."

The LAN-Cell's built-in VPN software eliminates the need to configure individual devices and extends secure corporate networks to remote devices that cannot run VPN client software. The LAN-Cell 2 supports 5 simultaneous IPSec tunnels, military grade DES, 3DES, AES256 encryption, XAUTH, CMP / SCEP, X.509 / PKCS#12 digital certificates and more.

"By using TheGreenBow's state of the art VPN client technology and innovative configuration wizard, Proxicast is able to deliver its customers a VPN solution that is customized for their LAN-Cell gateways, yet fully compatible with VPN routers from over 60 other vendors including Cisco, Fortinet, Juniper, Microsoft, and SonicWall," says Roger Simon, co-founder and CEO of TheGreenBow. "We are proud that our technology was chosen to bring a powerful yet easy-to-use solution to Proxicast's clients worldwide."

The Proxicast VPN Client provides full IPSec and IKE support, strong network authentication, strong network encryption through DES, 3DES, AES and RSA, support for multiple connection types like DSL, Cable, cellular and Wi-Fi and multiple simultaneous tunnels. Other VPN Client features such as Dynamic DNS support eliminates need for static IP's on either end of the VPN tunnel.

The VPN Configuration Wizard in the Proxicast IPSec VPN Client software complements VPN Wizard in LAN-Cell 3G router's firmware. Remote users can setup a VPN connection in under a minute with just a few parameters in each wizard. The Proxicast VPN Client software for Windows is also interoperable with hundreds of other IPSec hardware and software solutions from other leading security vendors.

The Proxicast IPSec VPN Client is available for all 32-bit and 64-bit versions of Microsoft Windows. A fully functional 30 day evaluation copy can be downloaded from Proxicast's web site ([http://www.proxicast.com/vpnclient/VPN\\_Client\\_Download.htm](http://www.proxicast.com/vpnclient/VPN_Client_Download.htm)) and is also available on the Product Support CD included with every LAN-Cell 3G cellular router.

## About the LAN-Cell 2

Proxicast's LAN-Cell 2 is a high-performance, rugged, upgradeable, professional-grade 3G Cellular VPN Firewall Router that connects multiple Ethernet devices to a single cellular data account for primary or backup connectivity eliminating redundant cellular service for multiple devices.

The LAN-Cell 2 incorporates a built-in wireless 802.11 a/b/g WiFi access point, a 4 port 10/100 Ethernet Switch, a 10/100 Ethernet WAN port and a RS-232 serial port. Auto fail-over switching between the Cellular, WAN & serial ports enables the LAN-Cell 2 to combine both 3G cellular, DSL, cable, satellite and other networks to offer unprecedented speed, reliability and quality of service.

The LAN-Cell 2 3G router is cellular carrier independent via its 3G modem PC-Card architecture, and can easily be upgraded as newer and faster cellular technologies such as 4G, LTE and WiMAX become available. The LAN-Cell 2 supports all major worldwide cellular (wireless) carriers including Verizon Wireless, Sprint PCS, Alltel Wireless, AT&T Mobility, T-Mobile, Rogers, Telus, Bell Mobility, Telcel, Orange, Vodafone, O2, Telstra and others.

## About Proxicast

Proxicast designs and manufactures innovative, commercial-grade, secure wireless communications equipment that enables customers to increase productivity, enhance security, improve operational efficiency and reduce on-going communication costs. Proxicast focuses on wireless equipment for use with all major worldwide cellular standards including (CDMA) EV-DO Rev-A, EV-DO Rev-0, 1xRTT (1x) and (GSM) HSUPA, HSDPA, UMTS, W-CDMA, EDGE and GPRS. Some cellular carriers include including Verizon Wireless, Sprint PCS, Alltel Wireless, AT&T Mobility (Cingular), T-Mobile, Rogers, Telus, Bell Mobility, Telcel, Orange, Vodafone, O2, Telstra and others. In 2003, Proxicast introduced the revolutionary and award winning, LAN-Cell Mobile Gateway, the original cellular router, which is in use at thousands of mobile and stationary application sites around the world. Proxicast is based north of Pittsburgh, Pennsylvania and is a privately-held corporation founded in 2000.

## About TheGreenBow

TheGreenBow is a European developer of Enterprise Security Software for laptop and mobile devices such as VPN software to secure access and communications for the mobile workforce. Their software is designed to be extremely easy to use with the strongest authentication and encryption standards. TheGreenBow Security software are also designed to integrate smoothly with existing enterprise security components such as PKI, LDAP or Radius servers, Tokens and VPN gateways. TheGreenBow has gained the reputation of the highest level of interoperability across different vendors of VPN gateways. Furthermore, through OEM agreements, the VPN Clients of 20 leading gateway vendors and telecom operators are powered by TheGreenBow technology.
