For Immediate Release

Proxicast Releases Version 4.70 of its IPSec VPN Client Software for Windows

Pittsburgh, PA. (July 23, 2010) – Proxicast (www.proxicast.com)

Proxicast, manufacturer of the LAN-Cell family of 3G cellular routers, announces the immediate release of version 4.70 of the Proxicast IPSec VPN Client Software for Windows which offers customers a simple to deploy and easy to use VPN solution for remote access over 3G cellular networks.

Version 4.70 retains all the features of previous versions, such as the easy setup VPN Wizard and adds over 36 new features, enhancements and updates including improved support for Microsoft Windows 7 security and communications mechanisms. Version 4.70 is a free upgrade to existing Proxicast IPSec VPN customers. A 30-day free trial version is available on the Proxicast web site http://www.proxicast.com/vpnclient/VPN_Client_Download.htm.

The Proxicast IPSec VPN Client software is able to deliver a Windows-based VPN solution that is customized for Proxicast LAN-Cell family of cellular routers, yet fully compatible with VPN routers from over 60 other vendors.

New features in version 4.70 of the Proxicast IPSec VPN Client include:

- Automatic setup of Windows 7 Firewall rules
- Support for the new Windows 7's WWAN Communications Driver model that enables Wi-Fi, 3G and 4G broadband modem devices
- Support for Czech and Danish in addition to 19 other languages
- Improved setup and deployment features

The Proxicast VPN Client provides full IPSec and IKE support, strong network authentication, strong network encryption through DES, 3DES, AES and RSA, support for multiple connection types like DSL, Cable, cellular and Wi-Fi and multiple simultaneous tunnels. Other VPN Client features such as Dynamic DNS support eliminates need for static IP's on either end of the VPN tunnel.

The Configuration Wizard in the VPN Client software complements VPN Wizard in LAN-Cell 3G router's firmware. Remote users can setup a VPN connection in under a minute with just a few parameters in each wizard. The Proxicast VPN Client for Windows is also interoperable with hundreds of other IPSec hardware and software solutions from other leading security vendors.

The Proxicast IPSec VPN Client is available for all 32-bit and 64-bit versions of Microsoft Windows. A fully functional 30 day evaluation copy of version 4.70 can be downloaded from Proxicast's web site (http://www.proxicast.com/vpnclient/VPN_Client_Download.htm). The Proxicast IPSec VPN Client is also available on the Product Support CD included with every LAN-Cell 3G cellular router.

About the LAN-Cell 2

Proxicast's LAN-Cell 2 is a high-performance, rugged, upgradeable, professional-grade 3G Cellular VPN Firewall Router that connects multiple Ethernet devices to a single cellular data account for primary or backup connectivity eliminating redundant cellular service for multiple devices.

The LAN-Cell 2 incorporates a built-in wireless 802.11 a/b/g WiFi access point, a 4 port 10/100 Ethernet Switch, a 10/100 Ethernet WAN port and a RS-232 serial port. Auto fail-over switching between the Cellular, WAN & serial ports enables the LAN-Cell 2 to combine both 3G cellular, DSL, cable, satellite and other networks to offer unprecedented speed, reliability and quality of service.

The LAN-Cell's built-in VPN software eliminates the need to configure individual devices and extends secure corporate networks to remote devices that cannot run VPN client software. The LAN-Cell 2 supports 5 simultaneous IPSec tunnels, military grade DES, 3DES, AES256 encryption, XAUTH, CMP / SCEP, X.509 / PKCS#12 digital certificates and more.

The LAN-Cell 2 3G router is cellular carrier independent via its 3G modem PC-Card architecture, and can easily be upgraded as newer and faster cellular technologies such as 4G, LTE and WiMAX become available. The LAN-Cell 2 supports all major worldwide cellular (wireless) carriers including Verizon Wireless, Sprint PCS, Alltel Wireless, AT&T Mobility, T-Mobile, Rogers, Telus, Bell Mobility, Telcel, Orange, Vodafone, O2, Telstra and others.

About Proxicast

Proxicast designs and manufactures innovative, commercial-grade, secure wireless communications equipment that enables customers to increase productivity, enhance security, improve operational efficiency and reduce on-going communication costs. Proxicast focuses on wireless equipment for use with all major worldwide cellular standards including (CDMA) EV-DO Rev-A, EV-DO Rev-0, 1xRTT (1x) and (GSM) HSUPA, HSDPA, UMTS, W-CDMA, EDGE and GPRS. Some cellular carriers include including Verizon Wireless, Sprint PCS, Alltel Wireless, AT&T Mobility (Cingular), T-Mobile, Rogers, Telus, Bell Mobility, Telcel, Orange, Vodafone, O2, Telstra and others. In 2003, Proxicast introduced the revolutionary and award winning, LAN-Cell Mobile Gateway, the original cellular router, which is in use at thousands of mobile and stationary application sites around the world. Proxicast is based north of Pittsburgh, Pennsylvania and is a privately-held corporation founded in 2000.
