For Immediate Release

Proxicast Releases Version 5.13 of its IPSec VPN Client Software for Windows

Pittsburgh, PA. (March 9, 2012) – Proxicast (www.proxicast.com)

Proxicast, manufacturer of the LAN-Cell family of 3G and 4G (LTE, HSPA+) cellular routers, announces the immediate release of version 5.13 of the Proxicast IPSec VPN Client Software for Windows which offers customers a simple to deploy and easy to use VPN solution for remote access over 3G and 4G cellular networks.

Version 5.13 retains all the features of previous versions, such as the easy setup VPN Wizard and adds many new features, enhancements and updates. Version 5.13 is a free upgrade for existing Proxicast IPSec VPN Client customers. A 30-day free trial version is available on the Proxicast web site http://www.proxicast.com/vpnclient/VPN_Client_Download.htm.

The Proxicast IPSec VPN Client software is able to deliver a Windows-based VPN solution that is customized for the Proxicast LAN-Cell family of 3G and 4G cellular routers, yet fully compatible with VPN routers from over 60 other vendors.

New features in version 5.13 of the Proxicast IPSec VPN Client include:

- Additional support for 3G and 4G (LTE, HSPA+) modems
- Ability to auto-launch Windows Remote Desktop upon tunnel connection
- Additional localization / language support
- Improved setup / deployment options
- Increased overall system stability and speed

The Proxicast VPN Client provides full IPSec and IKE support, strong network authentication, strong network encryption through DES, 3DES, AES and RSA, support for multiple connection types like DSL, Cable, cellular and Wi-Fi and multiple simultaneous tunnels. Other VPN Client features such as Dynamic DNS support eliminates need for static IP's on either end of the VPN tunnel.

The Configuration Wizard in the VPN Client software complements VPN Wizard in LAN-Cell router's firmware. Remote users can setup a VPN connection in under a minute with just a few parameters in each wizard. The Proxicast VPN Client for Windows is also interoperable with hundreds of other IPSec hardware and software solutions from other leading security vendors.

The Proxicast IPSec VPN Client is available for all 32-bit and 64-bit versions of Microsoft Windows. A fully functional 30 day evaluation copy of version 5.13 can be downloaded from Proxicast's web site (http://www.proxicast.com/vpnclient/VPN_Client_Download.htm). The Proxicast IPSec VPN Client is also available on the Product Support CD included with every LAN-Cell 3G and 4G cellular router.

About the LAN-Cell Family Of 3G and 4G Routers

The Proxicast LAN-Cell family of professional-grade 3G and 4G (LTE, HSPA+) cellular routers are high-performance, rugged and upgradeable. LAN-Cells can connect multiple Ethernet based computers and devices to a single cellular data account for primary or backup connectivity eliminating redundant cellular service for multiple devices. Proxicast products are optimized for corporate, financial, video surveillance, mobile in-vehicle applications, industrial automation, Machine-to-Machine (M2M) telemetry, SCADA and other WWAN applications.

The LAN-Cell's built-in VPN software eliminates the need to configure individual devices and extends secure corporate networks to remote devices that cannot run VPN client software. LAN-Cell 3G and 4G routers support multiple simultaneous IPSec tunnels, military grade DES, 3DES, AES256 encryption, XAUTH, CMP / SCEP, X.509 / PKCS#12 digital certificates and more.

LAN-Cell 3G and 4G routers are cellular carrier independent and use either PC-Card or USB cellular modem architecture - and can easily be upgraded as newer and faster cellular technologies such as 4G, LTE, and HSPA+ become available. LAN-Cell 3G and 4G routers support all major worldwide cellular (wireless) carriers including Verizon Wireless, Sprint PCS, AT&T Wireless, T-Mobile, Rogers, Telus, Bell Mobility, Telcel, Orange, Vodafone, O2, Telstra and others. LAN-Cell routers support 3G and 4G modems made by Sierra Wireless, Novatel, Option, Pantech, Samsung, Huawei, ZTE and others.

About Proxicast

Proxicast designs and manufactures innovative, commercial-grade, secure wireless communications equipment that enables customers to increase productivity, enhance security, improve operational efficiency and reduce on-going communication costs. Proxicast focuses on wireless equipment for use with all major worldwide cellular standards including (CDMA) EV-DO Rev-A, EV-DO Rev-0, 1xRTT (1x) and (GSM) LTE, HSPA+, HSPA, HSUPA, HSDPA, UMTS, W-CDMA, EDGE and GPRS on cellular carriers including Verizon Wireless, Sprint PCS, AT&T Wireless, T-Mobile, Rogers, Telus, Bell Mobility, Telcel, Orange, Vodafone, O2, Telstra and others. In 2003, Proxicast introduced the revolutionary and award winning, LAN-Cell Mobile Gateway, the original cellular router. Proxicast is based in Pittsburgh, Pennsylvania and is a privately-held corporation founded in 2000.
