

Aerial Antenna Installation Tips

- Orient antenna vertically
- Position near outside wall as high as possible
- Position away from:
 - CRT/TVs
 - lighting fixtures
 - radios
 - microwaves
 - motors
 - other wireless devices
 - large vertical metal or concrete objects
 - Low-E or tinted/coated windows
- Rotate on vertical axis to find strongest signal
- Use the correct antenna port on modem
- Press connector gently when attaching to modem
- Use 2 identical antennas spaced 22 inches apart if modem supports diversity
- Not intended for permanent outdoor use unless weather sealed
